## **DETAILED ACTION**

### ***Priority***

Acknowledgment is made of applicant's attempt to claim foreign priority based on PCT/SE01/00551 filed 22 March 2001 which depends from an application filed in Sweden on 22 March 2001. It is noted, however, that the Applicant's submittal form under 37 CFR 1.53(b) fails to cause the instant application to depend from said foreign priority documents.

### ***Oath/Declaration***

The oath or declaration is defective because of the unsupported claim of foreign priority as explained above. Either a new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required (see MPEP §§ 602.01 and 602.02), or corrective action must be taken to cause the instant application to properly depend from said foreign documents.

### ***Information Disclosure Statement***

The information disclosure statement filed 20 April 2004 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Said claim recites the limitation "sensor electrode" in line 5. There is insufficient antecedent basis for this limitation in the claim.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 8 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Patent Number 4,184,366 by Butler ("Butler"). The coin thickness determining device disclosed by Butler is operated by detecting a variation in capacitance between sensor electrode 60 the surface of a coin. The variation in capacitance occurs in a gap between the sensor electrode and the surface of a coin wherein the size of the gap depends on the thickness of the coin (see Figure 4 and column 5, lines 21-30).

Art Unit: 3653

Regarding claim 10, Butler further discloses coin inlet 12, coin feeder 18, coin discriminator (Figure 8), handling device 120, signal generating device 96 and processing device 150.

### ***Allowable Subject Matter***

Claim 9 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

### ***Conclusion***

Claims 1-5 have been canceled by the Applicant. Claims 6 and 7 are allowed. Claims 8 and 10 stand rejected and claim 9 stands objected to as explained above. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark J. Beauchaine whose telephone number is (571)272-6934.
